## Physics Class 10 ${ }^{\text {th }}$ <br> MRD-E/XII(A)

Physics Class $10{ }^{\text {th }}$
SECTION "A"

Pic. No.
Fic. No. $\qquad$

$\qquad$

Time: 15 Min
Marks: 12
Note: Use this sheet for this section. No Marks will be awarded on cutting, erasing or overwriting. Q. 1 Choose the correct option from the given Choices ie (A,B,C,D) and insert into the given relevant box.
(i) The time period of simple pendulum is independent of its $\qquad$ .
(A)Length
(B) Acceleration due to gravity
(C) Both A\&B
B (D) None
(ii) The speed of sound in air is $\qquad$ -.
$\square$
$\square$
(A) $330 \mathrm{~m} / \mathrm{sec}$
(B) $330 \mathrm{~cm} / \mathrm{sec}$
C) $330 \mathrm{~mm} / \mathrm{sec}$
(D) None
(iii) The focal length of a mirror is $\qquad$ of the radius of Curvature. $\square$
(A) double
(B) half
(C) one fourth
(D) None
(iv) The distance between focus and optical centre is called $\qquad$ .
$\square$
(A) pole
(B) radius of curvature
(C)focal length
(D )None
(v) The value of a charge on a Proton is $\qquad$ .
(A) $1.60 \times 10^{-19} \mathrm{C}$
(B) $1.60 \times 10^{-18} \mathrm{C}$
(C) $1.60 \times 10^{-20} \mathrm{C}$
(D) None
(vi) The frequency of A-C Electricity supplied to homes is $\qquad$ _.
(A) 50 Hz
(B) 25 Hz
(C) 100 Hz
(D) 220 Hz
(vii) Transformer works on the Principle of $\qquad$

(A )Self Induction
(B )Torque
(C) Mutual induction
(D) All
(viii) Electric \& Magnetic fields have no effect on $\qquad$ -

(A) $\alpha$-Particles
(B) $\beta$-Particles
(C) $\gamma$-Particles
(D) All of them
(ix) A substance through which current passes easily is called $\qquad$ .
$\square$
(A) inductor
(B) semi conductor
(C) conductor
(D) resistor
(x) An ideal ammeter has $\qquad$ resistance.

(A) low
(B) high
(C) zero
(D) None
(xi) To form a real image $\qquad$ is used. $\square$
(A) concave lens
(B) convex lens
(C) convex mirror
(D) None
(xii) In forward biased, the resistance of a diode is $\qquad$ - $\square$
(A) zero
(B) maximum
(C) minimum
(D) low

## SECTION 'B" <br> Marks: 32

Q2. Answer any Eight (8) of the following short questions. Each carries equal marks.
(i) Define frequency, wavelength and show that $V=f \lambda$.
(ii) Discuss the characteristics of musical sound.
(iii) What is the difference between concave and convex mirror?
(iv) The power of lens is 1.25 diopter. Find its focal length.
(v) Distinguish between conductor and insulator and give examples.
(vi) What is the difference between electric motor and electric generator?
(vii) Distinguish between electric potential and electric field intensity.
(viii) How much energy will be generated when 1 kg of uranium is completely vanished?
(ix) Discuss forward base.
(x) State and explain Ohm's Law.
(xi) What is meant by half life of radioactive element?

## SECTION "C"

Marks: 21

## Note: Attempt any THREE questions. All questions carry equal marks

Q3. (a) Define S.H.M: Show that the vibration of mass " $m$ " suspended from a spring is simple Harmonic motion.
(b) A simple Harmonic oscillator completes 20 vibrations in 2 sec . find its time period and frequency.
Q4. (a) Derive lens formula.
(b) A concave mirror form a real image twice the object. What is the image distance, if the object is placed at a distance of 3c.m?
Q5. (a) Explain the concept of electric energy and electric power. Discuss their units.
(b) How much energy is required to move 12c of charges against 220 volts?
Q. 6 (a) Discuss the nuclear fission reaction in detail.
(b) The half life of Uranium is $4.47 \times 10^{9}$ years. In how much time only 10 gm will be left out of 40 gm ?
