Roll No.

First Semester 2015
Examination: B.S. 4 Years Programme

PAPER: Computer-I
Course Code: COMP-101

TIME ALLOWED: 30 mins.
MAX. MARKS: 10

Attempt this Paper on this Question Sheet only.

Choose correct option.

1. The processed data is called -----
a. Processing b. Input c. Storage d. Information
2. The computer that makes data available to other computer is called -----
a. Client b. Server c. Smart Phone d. PDA
3. A word processor can be used for -----
a. Write text b. Edit text c. Print text d. All
4. Which of the following is not inside the system unit -----
a. RAM b. Monitor c. Hard Disk d. Adapters
5. CPU is an example of -----
a. Software b. Hardware c. Program d. None
6. The difference b/w ROM and RAM is -----
a. ROM is larger b. ROM is non-volatile
c. ROM is read only d. Both b & c
7. Which is not the part of CPU -----
a. ALU b. CU c. Bus d. None
8. The computer that makes data available to other computer is called -----
a. Client b. Server c. Smart Phone d. PDA
9. Computer cannot do anything without a -----
a. Chip b. Memory c. Output device d. Program
10. Microsoft Excel is a -----
a. Word Processing b. Spread Sheet Software
c. Database Management System d. None of above

UNIVERSITY OF THE PUNJAB

First Semester 2015
Examination: B.S. 4 Years Programme

Roll No.

PAPER: Computer-I
Course Code: COMP-101

TIME ALLOWED: 2 hrs. & 30 mins.
MAX. MARKS: 50

Attempt this Paper on Separate Answer Sheet provided.

Answer the following short questions. Each question carries equal marks. (2 x 10)20

1. What is Flash Memory?
2. Differentiate between software and hardware?
3. Differentiate between Impact and Non-Impact printers.
4. What is Touchpad?
5. Explain any two uses of MS Access.
6. What is Data Communication?
7. Differentiate between Database and Database Management System.
8. What are output devices?
9. Differentiate between Excel Work Book and Work Sheet.
10. Name types of computers.

Answer following long questions. (7.5 x 4) 30

1.

- a. Define Storage devices, explain all major types of storage devices. 7.5
- b. Explain Memory and its Types. 7.5

2.

- a. Describe and explain IF- ELSE formula in MS Excel with example. Also write a method of creating and formatting Charts in MS Excel. 7.5
- b. Write a method of creating a presentation in MS Powerpoint. Write any two features of MS Powerpoint with their uses and applications. 7.5

Section II

Give the short answers of the following questions:

(2 x 10 = 20)

1. Define operating system? Give two examples.
2. What is a PACKAGED SOFTWARE?
3. What are the components of GUI? Enlist please.
4. What is the purpose of if{} function of MS Excel?
5. What is computer memory? Describe its types.
6. What is the booting process of a computer?
7. Describe the functions of Task Bar in windows?
8. What is the difference between Hardware and Software?
9. What is the difference between Memory and Storage?
10. What data types we can save in an Excel Cell?

Section III

(10 x 3 = 30)

1. What are the different Paragraph formatting components? Explain.
2. What is a Monitor? Explain different types of Monitor.
3. What is the purpose of SUM() function in MS Excel? Explain the different components and formats of SUM() function..

Section – I

Multiple Choice: Select best possible option from the given below. (10 x 1 = 10)

1. In MS Windows which component provides a tree like view of disks, its files and folders?
 - a. My Computer
 - b. Control Panel
 - c. Windows Explorer
 - d. Start Menu
2. The software that removes viruses from disk are known as:
 - a. Antivirus
 - b. Remover
 - c. Virus killer
 - d. Destroyer
3. Which of the following lets you browse the contents of your computer.
 - a. My Network Places
 - b. Windows Explorer
 - c. My Computer
 - d. My Documents
4. The bar displayed at the bottom of the desktop is known as:
 - a. Menu Bar
 - b. Title Bar
 - c. Tool Bar
 - d. Task Bar
5. UNIVAC is
 - a. Universal Automatic Computer
 - b. Universal Array Computer
 - c. Unique Automatic Computer
 - d. Unvalued Automatic Computer
6. ALU is:
 - a. Arithmetic Logic Unit
 - b. Array Logic Unit
 - c. Application Logic Unit
 - d. None of these
7. IBM 1401 is
 - a. First Generation Computer
 - b. Second Generation Computer
 - c. Third Generation Computer
 - d. Fourth Generation Computer
8. High resolution means:
 - a. Greater number of pixels
 - b. Larger pixel size
 - c. Bigger picture
 - d. All of these
9. What does CPU stands for:
 - a. Core Processing Unit
 - b. Computer Processing Unit
 - c. Central Processing Unit
 - d. Combine Processing Unit
10. Formulas, Chart, Sorting, Auto fill are features of:
 - a. MS Word
 - b. MS Excel
 - c. Note pad
 - d. Word pad

PAPER: Computer Applications in Business
Course Code: COMP-121

TIME ALLOWED: 2 hrs. & 30 mins.
MAX. MARKS: 50

Attempt this Paper on Separate Answer Sheet provided.

Note: - Attempt all Questions

Q.2 Short Questions

(10 x 2=20)

- i. What is the difference between LAN & WAN?
- ii. What is a Digital Computer?
- iii. Write the procedure to set Header/Footer in MS word document.
- iv. Write down the steps for inserting a Picture in MS Power Point.
- v. Difference between "Save" and "Save As".
- vi. What is the difference between "System Software's" and "Application Software's"?
- vii. What is the difference between "Web Server" and "Search Engine"?
- viii. What do you mean by "Trace Precedents" and "Trace Dependents"?
- ix. Define RAM and why it is called RAM?
- x. Enlist the five (5) main services of the Internet?

Q.3 What is difference between data and information? Write a note on "data processing as a business need"

Marks (10)

Q.4 Write a note on the following:

Marks (10)

- a. Absolute and Mixed Cell References
- b. Margin, Orientation and Section Breaks (In MS Word 2007)

Q.5 What is MS Power Point and why we use it? How can we make a good presentation in MS Power Point 2007 using Animation?

Marks (10)

Q. 1 Select the best suitable answer:

- i. Which of the following is not a type of "Tab Stops" in MS Word 2007?
- Left Tab Stop
 - Right Tab Stop
 - Decimal Tab Stop
 - Float Tab Stop
 - Center Tab Stop
- ii. _____ cables carry data signals in the form of light.
- Coaxial
 - Fiber-Optic
 - Twisted-Pair
 - All of above
- iii. In which mode both sender and receiver can send data at a time:
- Simplex
 - Half Duplex
 - Full Duplex
 - Both a & b
- iv. Which topology requires a central controller or hub?
- Mesh
 - Star
 - Bus
 - Ring
- v. What is the default file extension for MS. Power Point 2007 document?
- .docx
 - .xlsx
 - .pptx
 - .xls
- vi. Which of the following option does not exist in "Presentation Views".
- Normal
 - Slide Sorter
 - Guide View
 - Notes Page
- vii. IF function have _____ part(s)
- Logical test
 - Value if true
 - Value if false
 - (a) and (b)
 - (a), (b) and (c)
- viii. The keyboard format that is most commonly used is the:
- Qwerty
 - Dvorak
 - Ergonomic
 - Virtual
- ix. A _____ is a computer that manages the resources on a network.
- Stand-alone computer
 - Laptop
 - Desktop
 - Server
 - Client
- x. =\$XFD10 is an example of _____ reference.
- Absolute Cell Reference
 - Relative Cell Reference
 - Mixed Cell Reference
 - Uniform Cell Reference

Q1: Choose the best answer

(10*1=10)

i) All records in a file have the same:

- a) contents
- c) both a and b

- b) structure
- d) none

ii) SQL stands for:

- a) short-query-list
- c) structure-query-language

- b) seek-qualify-label
- d) none

iii) which of three schemas used in three-scheme model is a complete logical view of database:

- a) external
- c) implementation

- b) internal
- d) conceptual

iv) which of the following is not a major area for the database administrator?

- a) planning
- c) implementation

- b) programming
- d) security

v) A person name, birthday, and social security number are all example of:

- a) attributes
- c) relationships

- b) entities
- d) descriptors

vi) A relationship is an association between _____.

- a) objects
- c) databases

- b) entities
- d) fields

vii) Every relation must have :

- a) primary key
- c) secondary key

- b) candidate key
- d) b and c

viii) In 3NF, a non-key attribute must not depend on a:

- a) non-key attribute
- c) composite key

- b) key attribute
- d) short key

ix) A relation is considered a:

- a) column
- c) two-dimensional table

- b) one-dimensional table
- d) three-dimensional table

x) DBMS is a software:

- a) Yes

b) No

Question # 2

(5 * 4 Marks)

Answer the following short questions:

- What is the role of Foreign and Primary Key in Data Base tables?
- What is the difference between HTML, XML, DHTML?
- List the names of the technology (languages or tools) used for developing Dynamic WWW?
- What are pros and cons of dynamic www?
- Make clear the difference between High level Programming languages and the scripting languages.

Question # 3

(6 * 5 = 30 Marks)

- Why java not supports Multiple Inheritance? Describe advantages of it.
- Write a Code in java: there is a class with name "shape" and classes "circle", "rectangle" and "triangle" have been derived from class shape. And all the derived classes must have a method to find area of their shape whose required inputs will be provided by user on run time.
- Assume that you have taken a text Box to store email id. Give the full script to verify that inputted data in this box is a well formed/structured email id.
- Write a script in any scripting language of your own choice which will verify that the URL entered in a text box with label "URL" is in correct format.
- Explain in detail, how can we develop static web sites using HTML?

OBJECTIVE

Question # 1 Select the correct option:

(1 * 10 Marks)

1. A web site address is a unique name that identifies a specific _____ on the web.
a) website b) web browser c) Link d) None of these
2. Websites can be divided into two broad categories _____
a) Content-based sites and service-based sites b) static and interactive
c) Forum website and Gallery Website d) Dynamic code and Dynamic content
3. Which of the following is not availed comment in java script?
a) /* This is a Java Script comment.
b) // This is a Java Script comment.
c) /* This is a Java Script comment */
d) All of these
4. Which statements about JDBC are true?
a) JDBC is an API to connect to relational-, object- and XML data sources
b) JDBC stands for Java Database Connectivity
c) JDBC is an API to access relational databases, spreadsheets and flat files
d) JDBC is an API to bridge the object-relational mismatch between OO programs and relational databases

(P.T.O.)

5. Which packages contain the JDBC classes?

- a) java.jdbc and javax.jdbc
- b) java.jdbc and java.jdbc.sql
- c) java.sql and javax.sql
- d) java.rdb and javax.rdb

6. Statements of JavaScript function are enclosed in.

- a) { & }
- b) [&]
- c) (&)
- d) None of these

7. Which of the following is server side programming languages?

- a) VBScript
- b) JavaScript
- c) JSP
- d) HTML

8. What kind of programming language is Java?

- a) Object-oriented programming language
- b) Relational programming language
- c) Sixth-generation programming language
- d) Database management language

9. The Extension with which web documents are saved is _____

- a) .class
- b) .c
- c) .html
- d) .css

10. The
 tag is used to add _____

- a) Long break
- b) Line break
- c) Braces
- d) All of these

OBJECTIVE

Q1: Each question has FOUR possible answers. Select the correct answer and encircle it.

1x 10 = 10

- i. Which one of the following is not an output device?
(a) Printer (b) Monitor (c) Webcam (d) both (a) & (b)
- ii. Decimal number 45 has its equivalent binary that is equal to:
(a) 101010 (b) 100001 (c) 101101 (d) 101000
- iii. Which of the following is a float data value in C++:
(a) false (b) 3.14 (c) 5 (d) true
- iv. The statements repeatedly executed from top to the bottom in C++ program flow control is called:
(a) Operator (b) sequence (c) repetition (d) selection
- v. The pictorial representation of solution for a particular problem is called:
(a) solution (b) pseudo code (c) algorithm (d) flow chart
- vi. The file extension of Microsoft word document is:
(a) .file (b) .ppt (c) .txt (d) .doc
- vii. The example of identity verification of a person by a personal characteristic is:
(a) CNIC (b) NTN (c) Biometrics (d) Roll number
- viii. The error that is reported by the compiler in C++ program is called:
(a) Program error (b) syntax error (c) logical error (d) All
- ix. The working memory area of any digital computer is:
(a) ROM (b) RAM (c) keyboard (d) CPU
- x. A computer program that facilitates user to perform his specific task is called:
(a) operating system (b) face book (c) application program (d) All
