## Section A: Multiple Choice Questions

Marks: 40
Time: 60 Minutes

|  |  | F-2) |
| :---: | :---: | :---: |
| Q. 2 | Choose the correct sentence. | 1. (A) (B) (C) (D) |
|  | A. She written a letter. | 2. (A) (B) (D) |
|  | B. She is write a letter. | 3. (A) (B) (C) (D) |
|  | C.-She wrote a letter. | 4. (A) (B) (C) (D) |
|  | D. She is written a letter. |  |

个: 6 C

| Q. 1 | 11 MOD 2 = <br> The result of the given arithmetic expression will be: <br> A. 22 <br> B. 9 <br> C. 1 <br> D. 5.5 | Q. 2 | In MS Excel, which of the following keys is used to obtain result of a formula? <br> A. Space bar <br> B. Control <br> C. Shift <br> D. Enter |
| :---: | :---: | :---: | :---: |
| Q. 3 | The connection of two or more computers is called a computer <br> A. resource. <br> B. network. <br> C. program. <br> D. software. | Q. 4 | The best choice of transmission media for long distance and high speed data communication is: <br> A. DSL <br> B. ISDN <br> C. Telephone line <br> D. Fibre optic |
| Q. 5 | File, Edit, View, Insert, Format commands are the part of <br> A. Tool bar. <br> B. Title bar. <br> C. Menu bar. <br> D. Formula bar. | Q. 6 | The first character of the variable name must be a / an <br> A. even number. <br> B. sign. <br> C. alphabet. <br> D. reserved word. |
| Q. 7 | Online reservation system of airlines is an example of <br> A. LAN. <br> B. MAN. <br> C. WAN. <br> D. PAN. | Q. 8 | By default, the path of saving MS Excel workbook is <br> A. My Documents. <br> B. My Computer. <br> C. Desktop. <br> D. Network. |
| Q. 9 | A harmful program that enters into a computer without the user's knowledge is a/an <br> A. virus. <br> B. worm. <br> C. adware. <br> D. malware. | Q. 10 | The cutting edge technology used for weather forecasting and television broad casting is: <br> A. Bluetooth communication system <br> B. Global positioning system <br> C. Cellular communication system <br> D. Satellite communication system |
| Q. 11 | In spreadsheet if we want to find net pay of an employee we will write: <br> A. Net pay = Gross pay + Tax <br> B. Net pay = Gross pay + Hour rate <br> C. Net pay = Gross pay $x$ Hour rate <br> D. Net pay = Gross pay - Tax | Q. 12 | In a spreadsheet, the 'No Fill' option is available in <br> A. Colour button. <br> B. Fill colour button. <br> C. Border button. <br> D. Format button. |

| Q. 13 | The arithmetic expression $11 / 2=$ <br> A. 5 <br> B. 5.5 <br> C. 22 <br> D. 13 | Q. 14 | Graphical representation of a computer program is called a <br> A. chart. <br> B. graph. <br> C. flowchart. <br> D. process. |
| :---: | :---: | :---: | :---: |
| Q. 15 | To perform mathematic operation we use <br> A. analytical expression. <br> B. arithmetic expression. <br> C. relational expression. <br> D. logical expression. | Q. 16 | Online email scanning and on demand scanning is provided by: <br> A. McAfee <br> B. AVG <br> C. Symantec <br> D. Norton |
| Q. 17 | Viruses usually infect the <br> A. processing devices. <br> B. storage devices. <br> C. communication devices. <br> D. input / output devices. | Q. 18 | The slowest network device is: <br> A. Network Interface Card <br> B. Dial up modem <br> C. Blue tooth <br> D. Switch |
| Q. 19 | Given below is a BASIC program finding the product of five numbers. <br> 10 INPUT A, B, C, D, E <br> 20 $\qquad$ <br> 30 PRINT product <br> 40 END <br> The statement written on line 20 should have been: <br> A. $P=A^{*} B^{*} C^{*} D^{*} E$ <br> B. $P=A^{*} B^{*} C^{*} D^{*} E$ <br> C. Product $=A^{*} B^{*} C^{*} D^{*} E$ <br> D. Product $=A^{*} B^{*} C^{*} D^{*} E$ | Q. 20 | A group of cells which runs horizontally is called <br> A. column. <br> B. row. <br> C. table. <br> D. cell. |
| Q. 21 | In programming, if a problem is not solved, the process should be <br> A. stopped. <br> B. eliminated. <br> C. skipped. <br> D. restarted. | Q. 22 | The result of the following arithmetic expression will be: $x=3+7^{\wedge} 2-25$ <br> A. -8 <br> B. -5 <br> C. 27 <br> D. 75 |
| Q. 23 | You are given a task to enter two numbers, add them and then display the result. <br> For this problem, the output will be : <br> A. Entering two numbers. <br> B. Displaying the sum. <br> C. Calculating the average. <br> D. Adding the numbers. | Q. 24 | A device that accepts the transmitted data is called a <br> A. communication device. <br> A. transmission medium. <br> B. sending device. <br> C. receiving device. |
| Q. 25 | Time saving features of data entry in Excel is called <br> A. formatting. <br> B. editing. <br> C. entering. <br> D. auto-filling. | Q. 26 | $105 \backslash 5 \times 5 \mathrm{MOD} 3+2$ <br> In the given expression, the integers division will be done at <br> A. $1^{\text {st }}$ step. <br> B. $2^{\text {nd }}$ step. <br> C. $3^{\text {rd }}$ step. <br> D. $4^{\text {th }}$ step. |

| Q. 27 | For carrying communication signals (data) from one place to another we use <br> A. sending device. <br> B. receiving device. <br> C. communication device. <br> D. transmission medium. | Q. 28 | The services provided by server computer are <br> A. dependent. <br> A. limited. <br> B. centralized. <br> C. decentralized. |
| :---: | :---: | :---: | :---: |
| Q. 29 | In a flowchart of making tea, the only process involved will be: <br> A. Add sugar <br> B. Add milk <br> C. Add tea leaves <br> D. Boil the water | Q. 30 | The best choice of detection and removing the virus from computer is to scan the <br> A. whole computer. <br> B. selected items. <br> C. selected drives. <br> D. selected folders. |
| Q. 31 | The Auto-fill, Autocorrect, and Autoformat features are available in: <br> A. Notepad <br> B. Typing tutor <br> C. MS Paint <br> D. MS Excel | Q. 32 | When we have to find smallest value in a set of numbers, we use <br> A. SUM function. <br> B. SQRT function. <br> C. MAX function. <br> D. MIN function. |
| Q. 33 | In a flowchart the rectangular symbol is used for <br> A. Input / output. <br> B. Decision. <br> C. Processing. <br> D. Data flow. | Q. 34 | In computer networking, MAN stands for <br> A. Mobile Area Network. <br> B. Multiple Area Network. <br> C. Metropolitan Area Network. <br> D. Multimedia Area Network. |
| Q. 35 | Virus spread in different computers through e-mail attachments with file extension <br> A. .ppt <br> B. .exe <br> C. .doc <br> D. .xls | Q. 36 | The command which allows to duplicate the data at different places is: <br> A. Copy <br> B. Paste <br> C. Cut <br> D. Edit |
| Q. 37 | While entering data in an Excel cell, the data is also shown in <br> A. Menu bar. <br> B. Title bar. <br> C. Formatting bar. <br> D. Formula bar. | Q. 38 | In order to keep a computer virus-free we need to <br> A. restart computer. <br> B. scan computer. <br> C. refresh the computer. <br> D. turned off the computer. |
| Q. 39 | In BASIC, if we misspell reserved words, then the error appear will be <br> A. physical error. <br> B. human error. <br> C. syntax error. <br> D. logical error. | Q. 40 | READ A, B, C <br> DATA 1, 2, 3, 4, 5 <br> In the given BASIC statements, the value of $B$ will be <br> A. 1 <br> B. 3 <br> C. 4 <br> D. 2 |

## MODEL PAPER COMPUTER EDUCATION (ENGLISH VERSION)

| Student <br> Name__ |
| :--- |

## Section B: Constructed Response Questions and Extended Response Questions Marks 60 <br> Time: 2 hours <br>  <br> 

Q.No.1: Write the purpose of transmission medium. Name any THREE wired transmission medium. (Total 4 Marks)
Q.No.2: Where is Local Area Network (LAN) used? Also write its THREE advantages.
(Total 4 Marks)
Q.No.3: Define computer worms. Write any THREE examples of them.
(Total 4 Marks)
Q.No.4: Write FOUR ways through which computer viruses are spread.
(Total 4 Marks)
Q.No.5: Name any FOUR icons present on the Standard Toolbar of MS Excel file.
(Total 4 Marks)
Q.No.6: Define row and column in MS Excel spreadsheet. Identify the cell address of the active cell in the given spread sheet.

(Total 4 Marks)
Q.No.7: Consider the following MS Excel worksheet.
(Total 4 Marks)

Write the syntax of appropriate functions used in MS Excel to perform the following tasks.

| i. | Calculate the sum of values of A2 to A5 | ii. Calculate the square root of cell A2 |
| :--- | :--- | :--- |
| iii. | Calculate the average of values from A2 to A5 | iv.Find the largest value from cells A2 to A5 |

## Q.No.8:

(Total 4 Marks)
a. Write the difference between 'cut' and 'copy' of data.
(2 Marks)
b. Write keyboard shortcut keys for the following tasks.
Q.No.9: Complete the following table of flowchart symbols by writing their purpose

| Flowchart | Purpose |
| :--- | :--- |
| Symbol |  |
|  |  |
|  |  |
|  | Calculation/ assignment of values |
|  |  |

Q.No.10: Draw a flowchart to take input of THREE numbers. Calculate and print their sum.
Q.No.11: Identify FOUR correct arithmetic expressions and re-write from the following list.
(Total 4 Marks)
i. $\mathrm{A}+\mathrm{B}+\mathrm{C}$
ii. $\quad \mathrm{A}=\mathrm{B}+0$
iii. $\quad X>Y$
iv. $\quad Z=0$
v. $3-2>0$
vi. $\quad 9 / 2=5$
vii. $\quad 7+2>5$
viii. $10-10=\mathrm{X}$
Q.No.12: State the purpose of the following BASIC commands.
(Total 4 Marks)
i. LIST 80-
ii. LIST 100-200
iii. RUN 20 -
iv. RUN - 50
Q.No.13: What is GPS? What is its purpose? Give any FOUR examples of the use of a navigation device.(Total $\mathbf{6}$ Marks)
Q.No.14: Write a BASIC program to take input of any 5 numeric values using READ DATA statement.
