Mafenamic acid

DENTAL HYGIENE HSSC-I SECTION - A (Marks 20)

Time	ìme allowed: 25 Minutes					Versi	Version Number 3 4 3 1					
Note:	OMR	Answe	er Sheet which	n should		d in the	first 25 minu	ites and	separately provided handed over to the il.			
Q. 1	Choose the correct answer A / B / C / D by filling the relevant bubble for each question on the OMR Answer Sheet according to the instructions given there. Each part carries one mark.											
	1)	Collection of nerve cell bodies outside brain is called:										
	•	Α.	Axon	B.	Synapse	C.	Nucleus	D.	Ganglion			
	2)	The	main nerve pas	sing thro	ugh foramen ova	ale is:						
		A.	Mandibular	nerve		B.	Palatine ne	rve				
		C.	Ophthalmic	nerve		D.	Lingual ner	ve	·			
	3) Which of the following is NOT found on first Mandibular molar?											
		A.	Cusp of cara	abelli		B.	Distolingua	l cusp				
		C.	Distobuccal	cusp		Đ.	Mesiolingua	al cusp				
	4)	The permanent upper canine erupts at the age of:										
		A.	8 years	B.	10 years	C.	9 years	D.	12 years			
	5)	The posterior 1/3 rd of the tongue has sensory nerve from:										
		A.	Vagus nerve	e		B.	Inferior alve	eolar nerve	e			
		C.	Mandilbular	nerve		D.	Glossophai	ryugeal ne	rve			
	6)	All th	All the muscles of tongue are supplied by hypoglossal nerve excpet palatoglossus which is supplied by									
		Α.	Trochlear nerve			В.	Trigeminal nerve					
		C.	Facial nerve)		D.	Accessory	nerve				
7) Lingual artery which supplies to the tongue and floor of the mouth is a branch								of:				
		A.	External carotid artery			B.	Femoral ar	Femoral artery				
		C.	Internal card	otid artery	1	D.	Radial arte	гу				
	8)	Malignant connective tissue neoplasm is called:										
		Α.	Papillomas			B.	Sarcomas					
		C.	Adenomas			D.	Carcinoma	s	÷			
	9) Which of the following vitamins has the antioxidant property?											
		A.	Vitamin B			B.	Vitamin C					

D.

Acetylasaliclic acid

4.00		average human adult contains approximately:								
10)	An avei	•		is approximately						
	A.	2 litters of blood	d		B.	3 litters of blood	d			
	C.	7 litters of blood	t	1	D.,	6 litters of blood	d .			
11)	Antibiotics are produced by:									
	A.	Red blood cells	;	was a same with	В.	White blood ce	lls			
	C.	Plasma cells			D.	Platelets	•			
12)	Which is the protein involved in clotting of the blood?									
	A.	Albumin	B.	Globulin	C.	Prothrombin	D.	Thrombin		
13)	Immuonoglobulin (Ig) is found in serum and on surface of most cells:									
	A.	lgA	B.	IgE	C.	lgG	D.	lgM		
14)	The mo	st numerous pa	pillas on	tongue are:						
	A.	Filliform	B.	Fungi form	C.	Uniform .	D.	Vallate		
15) There are different chemical agents used in dentistry to contr						control bleeding	by mear	ns of vasoconstriction		
	which of the following helps in vasoconstriction?									
	A.	Adrenaline				Calcium hydroxide				
	C.	Insulin			D.	Heparin				
16)	Principal fibers of the periodontal ligament are:									
	A.	Collagenous				Collagen and Elastic				
	C.	Elastic			D.	Reticular				
17)	Which of the following is contraindicated in the treatment of a pregnant woman?									
	Α.	Paracetamol	B.	Tetracycline	C.	Amoxill	D.	Folic acid		
18)	With ag	th aging pulp of the teeth becomes:								
	A.	More vascular				Less sensitive				
	C.	Less vascular				More fibrous				
19)	Elastic cartilage is found in the:									
	A.	External ear only				Articular surfaces of joint				
	C.	Epiglotis only				Both External ear and Epiglotis				
20)	Calcium in the blood is regulated by:									
•	A.	Pancreas	В.	Adrenal gland	C.	Thyroid gland	D.	Parathyroid gland

DENTAL HYGIENE HSSC-I

106

Time	allow	ed: 2:35 Hours Total Marks Section	Total Marks Sections B and C: 80				
NOTE	pro	swer any ten parts from Section 'B' and any three questions from Section 'C' vided answer book. Use supplementary answer sheet i.e. Sheet–B if required. V Itly and legibly.					
		SECTION - B (Marks 50)					
Q. 2	Answ	$(10 \times 5 = 50)$					
	(i)	Define epithelium, write its functions.					
	(ii)	Write names of voluntary and involuntary muscles.					
	(iii)	List the types of blood vessels.	·				
	(iv)	Name endocrine glands.					
	(v)	What are the functions of lymphatic system?					
	(vi)	Draw and label diagram of heart.					
	(vii)	Define sterilization. List the various methods of sterilization.					
	(viii)	Draw and label the diagram of mandible.					
	(ix)	Names the instruments used in manual scaling.					
	(x)	What are the advantages and disadvantages of ultrasonic scalar?	•				
	(xi)	Define inflammation. Differentiate between acute and chronic inflammation.					
	(xii)	Pulp is a vital tissue, changes occur throughout life. Discuss briefly.					
	(xiii)	What is the management of unconscious patient?					
	(xiv)	What is neoplasm? Write down two main ways of its classification.					
	(xv)	Draw and label dorsal surface of tongue.					
		SECTION – C (Marks 30)					
Note:	A	attempt any THREE questions. All questions carry equal marks.	$(3 \times 10 = 30)$				
Q.3	Descr	be Chlohexidine.					
Q.4	Name the branches of mandibular nerve.						
Q.5	Describe the composition of saliva.						
Q.6	Define immunity. Write briefly about cell-mediate immune response.						
Q.7	Describe the lymphatic drainage of head and neck.
