# Model Paper Statistics Intermediate Part-I (Objective) 

Total Marks: 17
Time Allowed: 20 Minutes
Q.No 1: Circle the correct option i.e. A/B/C/D. Each part carries one mark.

|  |  | The branch of statistics which deals with decision making about population is |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | A | Descriptive |  | B Inferential | C | Applied | D | Theoretical |
| 2 |  | The representative part of population is |  |  |  |  |  |  |  |
|  |  | A | Variable | B | B Constant | C | Attribute | D | Sample |
| 3 |  | Sorting fletters in a post office is an example of |  |  |  |  |  |  |  |
|  |  | A | Classificatio <br> n |  | B Tabulation | C | dichotomy | D | ogive |
| 4 |  | Difference between class boundaries of a class is called |  |  |  |  |  |  |  |
|  |  | A | Class interval |  | B Class mark | C | Frequency | D | Mid-point |
| 5 |  | Cumulative frequency is used in the formula of |  |  |  |  |  |  |  |
|  |  | A | Mean | B | B Median | C | Mode | D | G.M |
| 6 |  | Which of following may have two or more values? |  |  |  |  |  |  |  |
|  |  | A | G.M | B | B Mean | C | Median | D | Mode |
| 7 |  | Which of the following is a measure of Kurtosis? |  |  |  |  |  |  |  |
|  |  | A | $\mathrm{S}^{2}$ | B | B $\mathrm{b}_{1}$ | C | $\mathrm{b}_{2}$ | D | $\mathrm{a}_{3}$ |
| 8 |  | Measures of dispersions cannot be |  |  |  |  |  |  |  |
|  |  | A | Equal | B | B Un-equal | C] | Positive | D | Negative |
| 9 |  | Fisher's index number is a |  |  |  |  |  |  |  |
|  |  |  | Simple I.No | B | Unweighted I.No | C | Weighted I.No | D | CPI |
| 10 |  | The base period changes with the current year in |  |  |  |  |  |  |  |
|  |  |  | Fixed Base Method |  | ChainBase Method |  | Family Budget <br> - Method | D | Laspeyre's Method |
| 11 | The probability of a null event is always |  |  |  |  |  |  |  |  |
|  | A | A | 0 | B | 1 1 | C | 1/13 | D | 1/2 |
| 12 |  | Drawing of two cards without replacement is example of |  |  |  |  |  |  |  |
|  | A |  | Independent events | B | Dependent events | C | Joint events | D | Exhaustive events |
| 13 | The variable $X=$ No of heads, when three coins are tossed has values |  |  |  |  |  |  |  |  |
|  | A |  | 0,1 | B | 0,1,2 | C | 0,1,2,3 | D | 0,1,2,3,4 |
| 14 | Expected value of a random variable is equal to its |  |  |  |  |  |  |  |  |
|  | A |  | Mode | B | Variance | C | Median | D | Mean |
| 15 | The successive trials in Hypergeometric experiment are |  |  |  |  |  |  |  |  |
|  | A |  | Independent | B | Dependent | C | Equal | D | different |
| 16 | The mean of a hyper geometric Distribution is |  |  |  |  |  |  |  |  |
|  | A |  | $\frac{\mathrm{nK}}{\mathrm{N}}$ | B | $\frac{\mathrm{K}}{\mathrm{n}}$ | C | $\frac{\mathrm{N}}{\mathrm{nk}}$ | D | NK |
| 17 | The number of terms in the expansion of the Binomial ( + ) is |  |  |  |  |  |  |  |  |
|  | A |  | N | B | n -1 | C | $\mathrm{n}+1$ | D | 2 n |

# Model Paper Statistics Intermediate Part-I (Subjective) 

## Section I

## Marks 68

Time Allowed: 2:40 Hours
Q.No. 2 Attempt any eight parts. All questions carry equal parts.

| i:- Describe statistics as a discipline of science. | ii:- Name the methods of collecting primary data, |
| :---: | :---: |
| iiii:- Define qualitative data with examples | iv:- Highlights any two demerits of m |
| V:- Define the term Harmonic Mean. | vi:- Find median for $86,60,88,25,40,21$. |
| vii:- Explain the empirical relationship between mean, median and mode. | viii:- The speed of a bus in five intervals is $65,57,67,54$ and 35 find its average speed. |
| ix:- Why Fishers index number is called ideal index number. | x.- Define chain index number in your own words. |
| xi:- Enlist method of construction of CPI. | x :- Evaluate the weighted index if $\Sigma W I=12610$ and $\Sigma W=100$. |

Q.No. 3 Attempt any eight parts. All questions carry equal parts.

| i:- What are the basis of classification? | ii:- Discuss histogram in your own words. |
| :--- | :--- |
| iii:- Differentiate between diagram and <br> graph. | iv:- Define the term relative dispersion. |
| v:- For a series of 12 values find S.D if the <br> sum of squared deviations from mean is 192. | vi:- How will you calculate range from <br> grouped data? |
| vii:- write down the formula for corrected <br> moments. | viii:- Enlist any four properties of variance. |
| ix:- How many possible permutations can be <br> formed from the words COMMITTEE? | x:- Differentiate between independent and <br> dependent events. |
| xi:- Describe the classical and relative <br> frequency approaches of probability. | $\mathrm{X}:-\mathrm{If} A$ and $B$ are independent events with |

Q.No. 4 Attempt any six parts. All questions carry equal parts.

| i-: What is the difference between a variable <br> and a random variable? | iii-Enlist the values of random variable <br> $X=n u m b e r ~ o f ~ h e a d s ~ w h e n ~ t h r e e ~ c o i n s ~$ |
| :--- | :--- |
| are |  |
| tossed. |  |

## Section II

## Note:- Attempt any three question.

Q.5:- a. A variable $Y$ is determined from a variable $X$ by the equation $Y=10-4 X$. Find $Y$ when $X=-3,-2,-1,0,1,2,3,4,5$. And show that $=10-\overline{4}$.
b. For the data given below show that G.M>H.M

| Group | $1-5$ | $6-10$ | $11-15$ | $16-20$ |
| :---: | :--- | :--- | :--- | :--- |
| Frequency | 13 | 17 | 20 | 10 |

Q.6:- a. For following set of values find C.V. 13,17,20,25,30,35.
b. For the data given below find Pearson's coefficient of skewness

| Group | $11-20$ | $21-30$ | $31-40$ | $41-50$ |
| :---: | :--- | :--- | :--- | :--- |
| Frequency | 6 | 27 | 10 | 7 |

Q.7:- a. Compute chain indices for following data.

| Years | 2010 | 2011 | 2012 | 2013 | 2014 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Price | 27 | 18 | 31 | 39 | 45 |

b. Five balls are drawn from a box containing 7 red and 4 blue balls. If X denotes thenumber blue balls drawn from the box, obtain the probability distribution of $X$.
Q.8:- a. For the data given below compute mean and variance of the variable $X$.

b. A continuous r.v. has pdf $f(x)=c x \quad 0<x<2$ compute i: c ii: $P(1<x<2)$
Q.9:- a. Five dice are thrown. Determine the probabilities of $0,1,2,3,4$, and 5 sixes.
b. A committee of size 3 is to be selected from 4 women and 6 men. Obtain theprobability distribution of number of women in the committee.

The End

(a) Draw all possible samples of size 2 with replacement from the population consisting of values 3,7 and 10. Make sampling distribution of sample means and then find its mea $n$ and variance.
Then verify that
(i) $\mu_{\bar{x}}=\mu$
(ii) $\sigma_{\bar{x}}^{2}=\frac{\sigma^{2}}{n}$
(b) Find the proportion of even numbers of the samples of size 2 without replacement from the population consisting of values $3,4,5,6$ and 7 . Construct the sampling distribution of sample proportions and then find its mean and variance.
Verify that
(i) $\mu_{\hat{p}}=\mathrm{p}$
(ii) $\sigma_{\hat{p}}^{2}=\frac{p q}{n} \times \frac{N-n}{N-1}$

Where ' $p$ ' is population proportion.
(a) A random sample of size $\mathrm{n}=50$ from a normal population yielded the sample values $\bar{x}=190$ and $S^{2}=800$. Find $95 \%$ confidence interval for $\mu$.
(b) For a random sample of 10 from a normal population, $\bar{x}=20$ and $\sum X^{2}=5144$. Test the hypothesis that mean in the population is 19.50 at $1 \%$ level of significance.
(a) Determine the estimated regression equation $\mathrm{Y}=\mathrm{a}+\mathrm{bX}$, given that $\bar{X}=52, \bar{Y}=237, \sum(X-\bar{X})^{2}=280$ ( $\sum(\mathrm{X}-\bar{X})(Y-\bar{Y})=9871$.
(b) Find the co-efficient of correlation from the following data:

| $X$ | 9 | 8 | 7 | 6 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $Y$ | 17 | 18 | 15 | 12 | 18 |

(a) Determine whether the two attributes A and B are independent, positively associated or negatively associated using the following data:

|  | $B$ | $\beta$ |
| :---: | :--- | :---: |
| $A$ | 407 | 58 |
| $\alpha$ | 63 | 222 |

If association is present, then find co-efficient of association.
(b) Fit a straight line with origin at 1990 to the following data and find the trend values.

| Years | 1988 | 1989 | 1990 | 1991 | 1992 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Profit | 600 | 500 | 700 | 800 | 600 |

(The End)
